What was done?

№	Objective	Desired result	Obtained result
1	To study the organization of the system of collection of used oils from the public, firms and companies in France	The report on the organization of system of collection of used oils in France	Was studied the organization of system of collection of used oils
2	To form an idea of the necessary investments for the project implementation in the territory of Krasnoyarsk Territory	Calculation of the basic amount of the investments	Carried out calculation of the basic amount of the investments
3	To examine the key financial performance of current production	The report on the key financial performance of current production	The data are confidential information!
4	To get data about the assigned personnel of the enterprise	The report on the number of personnel required for the operation of the enterprise	The report on the number of personnel required
5	To obtain information about design organizations involved in the designing of the enterprise	The list of organizations that have a positive experience in designing enterprise required field of work	The list of designing organizations

The most important events for our project

1) Plants we were visited:

- Normandy refinery
- Total refinery
- Lyondell Basell
- Ineos
- Coca-Cola

2) Courses successfully covered:

- Separation processes
- Refining and petrochemicals overview

3) Meeting with representative of Axens group companies
